

WORLD WILDLIFE DAY 3rd MARCH, 2019

**WORLD
WILDLIFE DAY**
3 MARCH

*Life below water:
for people and planet*

World Wildlife Day is celebrated on the 3rd of March to create awareness among the people all around the world to help realize the importance of wildlife creatures like animals and plants. World wildlife day was declared on the 20th December 2013, by the United Nations General Assembly (UNGA) at its 68th session.

This year, 2019, the World Wildlife Day will be commemorated under the theme “Life below Water: For People and Planet”. This day aligns closely with sustainable development goal 14- Life below water- which focuses on marine species. It is a great opportunity to highlight the critical issues and values of marine wildlife to our everyday lives. The occasion will also celebrate successful initiatives to conserve and sustainably manage these species and to scale up support for the future.
